

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Ph.D. in Industrial & Systems Engineering, GPA: 3.94/4.30 Topic: Online learning and decision-making under nonstationary environments Advisor: Se-Young Yun	Fall 2018–Fall 2023
Korea Advanced Institute of Science and Technology (KAIST) M.S. in Graduate School of Knowledge Service Engineering*, GPA: 4.03/4.30 (*Now, Graduate School of Data Science)	Fall 2016–Fall 2018
Ulsan National Institute of Science and Technology (UNIST) B.S. in Physics, <i>Summa Cum Laude</i>	Spring 2011–Fall 2015

RESEARCH EXPERIENCE

CREST, ENSAE, IP Paris – FairPlay joint team Postdoctoral Researcher (Supervisor: Vianney Perchet) – Online learning and optimal stopping	France Summer 2025 - Current
Seoul National University Postdoctoral Researcher (Supervisor: Min-hwan Oh) – Online learning for combinatorial decision-making in matching, queueing, and dynamic pricing	Seoul Fall 2023 - Spring 2025
London School of Economics Research Intern (Supervisor: Milan Vojnović) – Online learning for scheduling jobs	London Spring 2021 - Summer 2021

RESEARCH INTERESTS

Online learning and decision-making, with applications to matching, queueing systems, dynamic pricing, recommendation, and optimal stopping.

WORKING PAPERS

1. (Under review) Batched Stochastic Matching Bandits ([Arxiv](#)); Jung-hun Kim and Min-hwan Oh
2. (Under review) Learning to Schedule in Parallel-Server Queues with Stochastic Bilinear Rewards ([Arxiv](#)); Jung-hun Kim and Milan Vojnović

ACADEMIC SERVICE

Reviewer

NeurIPS, ICML, ICLR, AISTATS, JMLR, CDC, AAAI

PRESENTATION

FairPlay Team Seminar

-Combinatorial Bandit Problems Motivated by Applications

Criteo, Paris, France

Sep 2025

GLAMPING Seminar

-Queueing Matching Bandits with Preference Feedback

Seoul National University, Seoul, South Korea

Dec 2024

INFORMS Annual Meeting

-Queueing Matching Bandits with Preference Feedback

Seattle, Washington, U.S

Oct 2024

SIAM Conference on Optimization (OP23)

-Scheduling Servers with Stochastic Bilinear Rewards

Seattle, Washington, U.S

June 2023

EXTRA

- Master Student in Physics, KAIST Fall 2015–Spring 2016

PROJECTS

- Design of Optimal Online Matching Markets 2025–2027
(funded by French National Research Agency (ANR), DOOM project)
- Bandit algorithms for multi-objective optimization and fair exploration 2023–2025
(funded by Korean Ministry of Education)

- Development of recommender systems under sparse labels (funded by Samsung Research) 2022–2023
- Development of prediction models for tire properties and inverse design models for tire recipes (funded by Hankook Tire & Technology Group) 2019–2020

TEACHING

- **Teaching Assistant** at ENSAE Paris
 - Advanced Machine Learning* Fall 2025
 - Theoretical Foundations of Machine Learning* Spring 2026 (upcoming)
- **Teaching Assistant** at KAIST
 - Statistical Machine Learning (IE343)* Spring 2019, 2020
 - Concentration inequalities in matrix data analysis (IE801(B))* Fall 2018
 - General Physics I (PH141)* Fall 2015
- **Teaching Assistant** at Enterprise
 - Samsung DS-KAIST AI Expert Program* Summer, Fall 2019
 - LG-KAIST AI & Big Data Advanced Course* Spring 2019

SCHOLARSHIPS AND AWARDS

- The National Scholarship for Science and Engineering, Korea Student Aid Foundation 2013–2014
- Award for Semester Academic Excellence, UNIST 5 times in 2011–2014
- Scholarship for Academic Excellence, UNIST 2011–2012
