

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Ph.D. in Industrial & Systems Engineering, GPA: 3.94/4.30 Topic: Online learning and decision-making under nonstationary environments Advisor: Se-Young Yun	Aug 2018–Aug 2023
Korea Advanced Institute of Science and Technology (KAIST) M.S. in Graduate School of Knowledge Service Engineering, GPA: 4.03/4.30	Sep 2016–Aug 2018
Ulsan National Institute of Science and Technology (UNIST) B.S. in Physics (Minor: Mechanical Engineering), <i>Summa Cum Laude</i>	Mar 2011–Aug 2015

RESEARCH EXPERIENCE

CREST, ENSAE, Institut Polytechnique de Paris – FairPlay Joint Team Postdoctoral Researcher (Supervisor: Vianney Perchet) – Online learning for optimal stopping and sequential decision-making under uncertainty	Palaiseau, France Jun 2025 - Present
Seoul National University Postdoctoral Researcher (Supervisor: Min-hwan Oh) – Learning-based control for queueing, matching, and combinatorial stochastic systems	Seoul, South Korea Sep 2023 - May 2025
London School of Economics, Department of Statistics Research Intern (Supervisor: Milan Vojnović) – Learning-based scheduling and resource allocation in parallel-server queues	London, UK Mar 2021 - Jul 2021

RESEARCH INTERESTS

Online learning, stochastic optimization, and data-driven decision-making under uncertainty and non-stationarity, with applications to industrial and service systems, including scheduling, queueing, matching, resource allocation, pricing, and optimal stopping.

WORKING PAPERS

1. (Under review at SODA 2027) Prophet Inequalities with Discounted Rewards ([Arxiv](#)); [Jung-hun Kim](#) and Vianney Perchet
2. (Under review at NeurIPS 2026) Asymptotically Optimal Learning in Parametric Prophet Inequalities ([Arxiv](#)); [Jung-hun Kim](#), Anna Grebennikova, and Vianney Perchet
3. (Under review at NeurIPS 2026) Stochastic Matching Bandits with Rare Optimization Updates ([Arxiv](#)); [Jung-hun Kim](#) and Min-hwan Oh

TEACHING

- **Tutorial Instructor** at ENSAE Paris
Theoretical Foundations of Machine Learning (APM_4ML04_AE) Spring 2026
Advanced Machine Learning (APM_5ML09_AE) Fall 2025
- **Teaching Assistant** at KAIST
Statistical Machine Learning (IE343) Spring 2019, 2020
Concentration inequalities in matrix data analysis (IE801(B)) Fall 2018
General Physics I (PH141) Fall 2015
- **Teaching Tutorials** at Enterprise
Samsung DS-KAIST AI Expert Program Summer, Fall 2019
LG-KAIST AI & Big Data Advanced Course Spring 2019

ACADEMIC SERVICE

Reviewer

NeurIPS, ICML, ICLR, AISTATS, JMLR, CDC, AAAI

PRESENTATIONS

KAIST ISE/GSDS Seminar – <i>Learning and Control in Stochastic Decision Systems</i> <i>Queueing, Matching, and Combinatorial Learning</i>	Daejeon, South Korea Aug 2026
Yonsei University Department of Applied Statistics Seminar – <i>Learning and Optimal Stopping</i> <i>Sequential Decision-Making under Noisy and Nonstationary Information</i>	Seoul, South Korea Aug 2026
International Laboratory on Learning Systems (ILLS) Seminar – <i>I.i.d. Prophet Inequalities with Discounted Rewards</i>	Montréal, Canada (remote) Jul 2026
Seoul National University Department of Statistics Seminar – <i>Reliable Learning and Decision-Making under Uncertainty</i> <i>Online Learning, Optimal Stopping, and Stochastic Systems</i>	Seoul, South Korea May 2026
FairPlay Seminar – <i>Combinatorial Bandit Problems Motivated by Applications</i>	Criteo, Paris, France Sep 2025
The Institute for Data Innovation in Science (IDIS) Seminar – <i>Queueing Matching Bandits with Preference Feedback</i>	SNU, Seoul, South Korea Dec 2024
INFORMS Annual Meeting – <i>Queueing Matching Bandits with Preference Feedback</i>	Seattle, Washington, U.S. Oct 2024
SIAM Conference on Optimization (OP23) – <i>Scheduling Servers with Stochastic Bilinear Rewards</i>	Seattle, Washington, U.S. Jun 2023

PROJECTS

• Design of Optimal Online Matching Markets (funded by French National Research Agency (ANR), DOOM project)	2025–2027
• Multi-Objective Optimization and Fairness of Exposure in Bandit Algorithms (Principal Investigator; funded by the Ministry of Education, Republic of Korea, G-LAMP Program) Grant amount: KRW 30 million (approx. EUR 18,300)	2023–2025
• Fast Adaptive Prediction Model for Sparse Big Data (funded by Samsung Research)	2022–2023
• Scheduling Jobs with Complex Delay Costs in Data Processing Platforms (research project at the London School of Economics and Political Science; funded by Meta (formerly Facebook), Systems for Machine Learning Research Award)	2020–2021
• Development of Prediction Models for Tire Properties and Inverse Design Models for Tire Recipes (funded by Hankook Tire & Technology Group)	2019–2020

SCHOLARSHIPS AND AWARDS

• NRF Postdoctoral Fellowship Abroad , National Research Foundation of Korea (NRF), Korean Government 2026–2027 Project: <i>Learning for Optimal Stopping in Nonstationary Environments</i> Grant amount: KRW 60 million (approx. EUR 36,700)	
• The National Scholarship for Science and Engineering, Korea Student Aid Foundation	2013–2014
• Award for Semester Academic Excellence, UNIST	5 times in 2011–2014
• Scholarship for Academic Excellence, UNIST	2011–2012
